Datasoft Software Consulting. Providing Complete IT Solutions

Company Profile

Datasoft is a world class professional services company providing solutions and related consultancy in Software development, Enterprise application implementation, Database management, Business intelligence and workforce allocation. Founded in 1998, the group has gained its leadership by leveraging its functional and technological expertise to successfully address the organization's most critical challenges.

About Datasoft

Characterized by unequalled quality, superior client centric performance, extensive resource availability, and exceptional global sourcing and delivery capabilities, Datasoft Software Consulting Inc. is a complete IT solutions and support services provider that combines an impressive command of industry expertise and leading technology capabilities with fully integrated "hybrid" on-site and off-site accelerated delivery methodologies at substantial cost savings.

Proud to be recognized as a valued business partner by leading multinational fortune 500 companies in the USA and abroad

A Blue Print for Success

Datasoft's Global Solution Architects, Project Managers, Client Solution Teams and Workforce Program Managers ensure complete client satisfaction and the full success of each project by diligently focusing on mature project governance processes, prerequisite proactive communication and well defined SLA's to ensure that thorough knowledge transfer, performance tracking, and performance target objectives are suitably aligned and met.

Datasoft provides the "short term" tactical and "longer term" strategic - global sourcing and delivery solutions - that most cost effectively accommodate the exacting specifications of our clients' unique business initiatives, resource management requirements, budget constraints and time-to-market considerations.

Datasoft's Mission

With a business environment becoming more and more competitive and global, companies need to exceed their stakeholder's expectations: better serve and understand their customers, comply with regulations, develop solid partnerships and deliver value to their shareholders. Datasoft's mission is to assist organizations in addressing these challenges. Leveraging its, industry expertise and best practices, Datasoft consistently seeks excellence for its customers. More than a service provider, Datasoft becomes a trustworthy partner that helps companies to gain and maintain their competitive advantage.

"Datasoft provides the innovative solutions necessary for companies to succeed in today's extended enterprise business environments."

Business Benefits

- Better Understand and serve our customers
- Increase operational efficiency
- Increase business agility
- Increase transparency

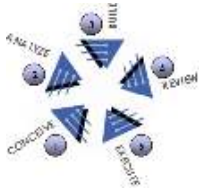

Solutions

Software Development & Management

Datasoft's Advanced Software Development Solution Architects provide full lifecycle development and application management solutions for Internet / Intranet applications, client server architectures and legacy systems.

Datasoft's dedicated Software Development and Management Team is proficient in many development environments and languages such as; Java, J2EE, .Net, C#, XML, Visual Basic (VB), Power builder, JDeveloper, Visual C++, C, C++, Visual Fox Pro, Visual J++, Visual Source Safe, Oracle, Sql Server, DB2, Mysql, BEA Web logic, IBM Web Sphere, IIS, JBoss and Apache.

Datasoft's well documented, tested and proven methodology comprises a series of solution frameworks that embody best practices, implementation templates and guidelines. This methodology highlights communication procedures between various peers, deliverables during each phase, forms of communication and reports to ensure the highest quality delivery.

Specifically designed to support our global delivery model with a significant local onsite presence combined with offsite development, Datasoft Team takes a holistic view with every project engagement and breaks it down into the five basic phases of our proprietary methodology.

Phase I	<ul style="list-style-type: none"> • Define business objectives, strategy and initiatives • Risk assessment • ROI • Review infrastructure
Phase II	<ul style="list-style-type: none"> • Create project plan • Define management process • Build team • Data Model • High level design • Detail design
Phase III	<ul style="list-style-type: none"> • Prototype application • Build Application • Conduct milestone-compliance review • Create use case • Conduct independent unit test
Phase IV	<ul style="list-style-type: none"> • Perform integration testing • Perform system testing • Documentation • User manual • Help files
Phase V	<ul style="list-style-type: none"> • Acceptance test • Implementation • ROI Analysis • Performance Review • Maintenance

Solution Benefits

Project Management Experts
Innovative Approach
Round The Clock Support
Client Satisfaction Guaranteed

Enterprise Application Implementation & Integration

Datasoft's Enterprise Solution Architects, consultants and professionals provide business centric implementation support services across most of today's leading and forward-looking enterprise information technology environments, with Oracle as a principle focus.

The elite project solution teams; Managing Principals, Business Analysts, Database Administrators, Upgrade Specialists, Testers, Trainers and Security Experts that comprise Datasoft's Global Enterprise Solution Team offer implementation, upgrade, enhancement and maintenance support services.

Core competencies of Datasoft Enterprise Solution Architects, consultants and professionals include Oracle, SAP and PeopleSoft for Enterprise Resource Planning (ERP), i2, Manugistics, Oracle APS, SAP APO, and Ariba for Supply Chain Management (SCM), Oracle CRM, mySAP, PeopleSoft CRM and Siebel for Customer Relationship Management (CRM) and TIBCO.

Database Managed Services

Datasoft's Database Managed Services Teams accommodate our clients DB2, SQL Server, Sybase and Oracle database maintenance and support requirements with flexible, highly reliable, scalable and secure custom onsite and offsite and solution strategies ranging from specialized performance tuning to complete 24 x 7 x 365 administration.

Oracle Enterprise Solution Team

Our 11i Applications Solution Team specializes in providing intelligent integrated enterprise solutions with the full spectrum of Oracle products. We apply powerful yet flexible enterprise solutions, which supply the business intelligence necessary to make tactical and strategic decisions.

We focus on evaluating our clients' business need and providing solutions using a mix of industry business expertise with strong technology backing. We deliver integrated solutions, leveraging best practices with advanced technology integration. Our Oracle Applications Business analysts have a wide range of experience across industries and are supported by very strong onsite/offsite technology teams of DBA's Developers and Reporting specialists.

Our Oracle project-based consulting provides technological expertise, domain knowledge, and best-of-breed industry standard methodologies for the successful delivery of complete, integrated solutions focused on your business. These are delivered to our customers by leveraging our global delivery model using a mix of Oracle applications business analysts, application developers, database administrators and reporting specialists.

We provide end to end business centric solutions for the implementation of Oracle Ebusiness solutions. Our Oracle Solution Team possesses years of industry experience with different technologies at a multitude of levels. This allows our team to avoid traditional pitfalls while ensuring quality deliverables of our customers business needs on time and budget.

Based on a global implementation methodology, Datasoft delivers implementation services covering all tasks from high level requirement analysis to post production support. Our Business analysts will work with customers to help with gathering requirements, business process mapping, gap analysis, legacy data conversions, interfaces, customizations, training, implementation and post implementation support.

Our Solutions are flexible catering to the customers needs from implementing a single module and providing incremental value to implementing a suite of products.

- Installation and configuration
- Business Process analysis and Applications configuration
- Testing and training for Oracle Applications

Hosting Services with Hosting Partners

- 24x7 Hosting for all Oracle applications
- Application & Database management

Oracle Upgrade Services.

Our upgrade methodology focuses on minimizing downtime and a smooth transition from one version to another for the end users. Our global team of Business Analysts, Application Developers, DBA's work towards iterative testing of the upgrade process before implementing the solution. Our proven and tested methodology using our offsite resources enables us to drastically shrink the cost and time for the upgrade. We provide a team of resources who will work with your oracle applications group through the entire upgrade process from business case for upgrades to post implementation support for the upgrade process.

Oracle Maintenance Support

Datasoft has designed these services for providing technical services for companies who have implemented and are maintaining Oracle Applications (Oracle Ebusiness Suite of Applications). These services are designed for companies without in-house DBA support or companies that are going through a major implementation, upgrade or conversion project and need additional support for existing technical support services like Database, Network and Operating System Administration.

Business Intelligence & Data Warehousing Services

With prerequisite domain expertise and significant technical proficiency with DB2, Oracle, Reradiate, SyBase, Microsoft SQL Server and Inform ix databases and ETL tools and mining technologies that include Informative, Data Stage, SAS, COGNOS, Business Objects and Micro Strategy Datasoft's Business Intelligence and Data Warehousing Solution Architects and Managing Principals provide value driven solutions and support services for our clients data warehousing design and implementation, datamart consolidation, ETL implementation, data cleansing, reporting and maintenance initiatives.

Workforce Allocation Services

Datasoft's world-class recruitment and global resource management professionals specialize in advancing our clients priority initiatives by providing targeted strategic staffing solutions that streamline critical workforce allocation processes.

Datasoft's clients have unparalleled access to a global network of highly qualified individuals and diverse teams of performance guaranteed information technology professionals available on a contract, "contract with right-to-hire" and a direct hire basis.
